

# Tips and Tricks for A Happy Horse

HERE ARE 5 WAYS TO HAVE A HAPPY HORSE

## 1. ROUTINE

Horses are creatures of habit, they like to know what they can expect of the day. Maybe a feed on arrival back into the stable, being turned out in the morning, a belly scratch every time you catch them!

## 2. FRIENDS

Horses are herd animals - provide a friend for them to hang out with - either over a fence, same field or the stable next to them!

## 3. THEY CAN SMELL FEAR

Be confident around a horse, they can sense/smell fear. Have purpose, and command respect with your presence and mental attitude.

## 4. BUBBLE WRAP

Refrain from bubble wrapping them. They are wild animals, and feel the cold much later than we do, and feel the heat much quicker than we do. They're not human, refrain from treating them like they are.

## 5. FEED THEM CORRECTLY

They can live on hay/haylage alone. You don't NEED to feed them. Feed according to work load, weight, age, health status and needs. Over feeding is unfair.
