

Tips and Tricks for Cleaning Tack

HERE ARE 5 WAYS TO IMPROVE TACK CLEANING

1. HOT WATER

Use hot water to get the grease moving easily. This helps the leather to open up to take in the balm too!

2. USE A TOWEL

Use a towel rather than a sponge, this helps scrub more effectively at the harder grease

3. LEATHER BALM & OIL

Use leather balm after the water, to moisturise and clean the leather.
Oil your tack once a year.

4. DON'T FORGET YOUR BOOTS

Clean your boots at the same time, and they will be silky smooth too!

5. LET TACK LAST!

Keep your tack warm to keep it from cracking, or breaking. If it gets wet, add some balm and then allow it to fully dry.
